

## ACCREDITATION COURSE LOGIKS COGNITIVE ABILITY TEST SERIES

Understanding the cognitive aptitude of current and potential employees enables organisations to make informed, defensible talent decisions, improve performance outcomes, and use assessment time effectively. For these reasons, cognitive ability assessment remains one of the most powerful and well-established predictors of workplace performance.

The Logiks Cognitive Ability Test Series provides a modern, flexible approach to ability assessment, combining a strong candidate experience with straightforward administration and immediate, actionable analytics. Designed for use across a wide range of roles and organisational contexts, Logiks supports fair, objective, and evidence-based decision-making.

## Course Overview

This 1-day accreditation course provides delegates with a comprehensive understanding of cognitive ability testing and its application within occupational assessment. The programme explores the theoretical and statistical foundations of ability assessment, alongside practical guidance on interpretation and use.

During the course, participants will gain a detailed understanding of the Logiks Cognitive Ability Test Series, including when and how to use the different assessment options. Delegates will develop practical competence in administering Logiks assessments, interpreting results accurately, and drawing balanced, meaningful conclusions. The course also focuses on delivering clear, constructive feedback, ensuring that results are communicated in a way that is accessible, fair, and aligned with best-practice guidelines.

## Learning Outcomes

- Have the knowledge, skills, and confidence to administer Logiks ability assessments in line with professional and ethical best practice
- Understand the psychometric principles, statistics, and scientific evidence underpinning cognitive ability assessment
- Learn how to select and use the appropriate Logiks assessments for different roles and talent decision-making contexts
- Develop the skills to interpret Logiks results accurately and deliver clear, effective ability-based feedback using Logiks reports

## Who Will Benefit?

This course is suitable for professionals involved in assessment and strategic talent decision-making, including:

- Independent and in-house consultants
- HR professionals
- Learning and development professionals
- Occupational psychologists
- Hiring managers

## Reports Available

- User report
- Participant Feedback report
- Excel Group Report
